Orchids are considered by many people to be the most elegant, delicate, beautiful plant in the world. They come in every color of the rainbow, plus white and nearly jet black. However, outside of the tropics, orchids are not exactly an easy garden plant. Nor are they an inexpensive variety at the local flower shop.

So, many people go for the look of orchids without the trouble of maintenance by buying an artificial orchid. It is surprising how much an artificial orchid can look like a real one. In fact, some decorators will construct a custom composition, hand-making small individual details that really bring the plant to life.
